Profile

DevOps / Kubernetes Engineer with enterprise experience in banking environments, specializing in Kubernetes (RKE2/EKS), GitOps, CI/CD automation, and cloud infrastructure across AWS, GCP, and Azure. Strong focus on system reliability, observability, security, and highly available production platforms.

Professional Experience

DevOps / Kubernetes Engineer, Bank AL Habib

07/2025 – Present | Karachi, Pakistan

- Managed production Kubernetes clusters across on-premises RKE2 and Azure AKS, ensuring high availability, security hardening, scalability, and optimal cluster performance.
- Deployed and managed applications using Helm, including Longhorn, NGINX Ingress Controller, RabbitMQ, and KeyDB.
- Designed and maintained Grafana dashboards to monitor Kubernetes clusters, infrastructure metrics, and application performance.
- Supervised Harbor Container Registry, implementing image versioning, vulnerability scanning, role-based access control, and secure image distribution.
- Implemented CI/CD and GitOps workflows using Argo CD, enabling automated, consistent, and safe rollbacks across environments.
- Administered and monitored 70+ production servers, maintaining **99.9% uptime** and improving incident response times.
- Implemented application monitoring, distributed tracing, and error tracking using Sentry, improving incident detection and root-cause analysis.
- Ensured system reliability, observability, and rapid incident response through proactive monitoring, alerting, and operational best practices.

DevOps Engineer, Eocean

02/2023 – 07/2025 | Karachi, Pakistan

- Deployed and managed Python and Node.js applications using Docker, NGINX, and uWSGI, improving deployment consistency and reducing manual errors by **60%**.
- Designed and maintained CI/CD pipelines using Jenkins, GitLab CI/CD, and Bitbucket Pipelines, integrating SonarQube for automated code quality analysis and security checks.
- Architected and optimized a high-throughput SMS delivery service capable of processing approximately **450 TPS**, ensuring high availability, low latency, and reliable message delivery in production.
- Migrated microservices from Docker Compose to Kubernetes (Amazon EKS), improving scalability, fault tolerance, and resource utilization through optimized pod and service configurations.

- Architected and operated secure, highly available cloud infrastructure on AWS and GCP, covering networking, IAM, observability, and production-grade workloads.
- Built monitoring, logging, and alerting solutions using the ELK Stack, Zabbix, and SIEM, enhancing system reliability, observability, and incident response.
- Collaborated closely with development teams to troubleshoot production issues, optimize application performance, and improve infrastructure stability and deployment efficiency.

Associate DevOps Engineer, Nanosoft Technologies (Pvt) Ltd 08/2022 – 02/2023 | Karachi, Pakistan

- Provisioned CI/CD workflows using GitHub Actions to automate application deployments and backup tasks.
- Utilized Terraform to provision and manage cloud resources consistently across environments.
- Deployed and administered Laravel and WordPress applications using LAMP stacks.
- Provided L2 technical support to clients, diagnosing and resolving application, deployment, and infrastructure issues, and escalating complex problems when required.
- Assisted in building and supporting AWS infrastructure using services such as EC2, S3, RDS, Lambda, Amplify, ECS, and EKS.
- Troubleshoot incidents and deployment issues, contributing to faster resolution and improved production stability.

DevOps Engineer Intern, Nanosoft Technologies (Pvt) Ltd 05/2022 – 08/2022 | Karachi, Pakistan

- Analyzed application requirements, built the required infrastructure, and deployed applications on AWS using cost-effective services.
- Implemented security tools and solutions, including Brute Force Detection, ConfigServer Security & Firewall (CSF), Chkrootkit, WAF, RKHunter, and Maldet/ClamAV, to protect Linux servers against various cyberattacks.
- Worked with PostgreSQL and MongoDB databases, supporting database administration and troubleshooting.

Education

Bachelor's in Computer Engineering 01/2019 – 02/2023 | Karachi, Pakistan
Sir Syed University of Engineering and Technology

Skills

Kubernetes (RKE2, EKS), Helm, Argo CD, GitOps, Docker, Terraform, AWS, GCP, Azure, Linux, Grafana, Elastic Stack (Filebeat, APM), Sentry, RabbitMQ, Redis, KeyDB, Jenkins, GitLab, Bitbucket, IIS, .NET, Monitoring, Observability

Publications

Awareness of DevOps Training Session & Roadmap, Sir Syed University of Engineering and Technology

Certificates

Linux Essentials Professional Development
 Cisco Networking Academy

Workshop on Managing Microsoft Azure Infrastructure using Terraform

Certified Kubernetes Application Developer
 KodeKloud

AWS Practitioner
 Sir Syed University of Engineering and Technology, Karachi.

Basics of Kubernetes
 10Pearls University
